

Plexiglass Barriers

Key Benefits:

The CDC has recommended individuals keep at least 6 feet in distance from others nearby. Though this may seem nearly impossible in some settings, Sodexo | Roth offers a solution manufactured in our in-house metal fabrication shop. Maintain social distancing and physical separation while protecting employees and clients alike with our plexiglass desk and partition barriers. These partitions are more important than ever to maintain cleanliness in a variety of locations, such as work spaces. The plexiglass panels provide an added layer of physical protection, without reducing visibility.

- Stainless Steel
- Made to Order
- Made in Ohio
- Discount in Volumes
- Short Lead Time
- Minimal Assembly
